FONDAY MOISTURE CONTROL · BLUE INDICATING SILICA GEL

Rechargeable Desiccant Beads

Blue indicating silica gel in refill buckets from 2.1 to 12 lb. The beads pull moisture out of enclosed spaces, turn from blue to pink when they are full, and recharge for repeated reuse in a microwave or oven.

Blue Indicating Silica Gel

THE RANGE

Blue indicating silica gel

The blue formula uses the same 3–5 mm industry standard bead and the same rigid refill buckets with a pour-friendly neck. Sizes run from 2.1 to 12 lb, all in buckets, and every pack recharges in a microwave or oven.

CLASSIC INDICATOR

Blue Indicating Silica Gel

- Beads are blue when dry and turn pink as they absorb moisture.
- Sizes: 2.1, 4, 6, 8 and 12 lb, all in buckets.
- Strong visual contrast makes it easy to read from a distance.

SIZE	NET WEIGHT	PACKAGING	INCLUDED MESH BAGS	FORMULA
2.1 lb	33.6 oz · 953 g	Bucket	—	Blue silica gel
4 lb	64 oz · 1.81 kg	Bucket	—	Blue silica gel
6 lb	96 oz · 2.72 kg	Bucket	—	Blue silica gel
8 lb	128 oz · 3.63 kg	Bucket	—	Blue silica gel
12 lb	192 oz · 5.44 kg	Bucket ×2 (2 × 6 lb)	—	Blue silica gel

Bulk packs: the 12 lb pack contains two 6 lb buckets, so you can rotate one bucket in service while the other recharges. Every bead in this guide measures 3–5 mm and can be poured straight into any breathable container of your own.

HOW TO USE

Place, watch, recharge

Fonday beads work in any enclosed space. Put them in, let them pull the moisture out, and watch the colour to know exactly when it is time for a recharge.

Place the beads 01

Set a bucket inside the space, or pour beads into a breathable pouch or container and tuck them next to what you are protecting. Keep the space closed.

Let them work 02

The beads absorb moisture from the air and from the items around them. Drying takes from a few hours to several days depending on how damp the space is.

Check the level 03

Read the bead colour. The guide below shows exactly what each stage means.

Recharge & reuse 04

When the beads are saturated, dry them in a microwave or oven (page 4). Once cool, they are ready to go back to work.

READING THE BEADS

What the colour is telling you

Blue indicating silica gel

Classic cobalt chloride indicator

Blue
dry

Pink
saturated

Beads are blue when they are dry. They turn pink as they absorb moisture. Recharge when the colour has shifted to pink.

COMMON USES

Anywhere trapped moisture causes trouble

3D printer filament

Keep spools bone dry in dry boxes and storage cabinets to stop brittle prints and stringing.

Camera & optics

Protect lenses, bodies and sensor bags from fungus and fogging in cases and cabinets.

Safes & tool boxes

Stop rust on firearms, tools and dies inside gun safes, cabinets and drawers.

Electronics & parts

Dry components, boards, seeds and powders in storage bins and component drawers.

Closets & storage

Fight musty smells and damp patches in wardrobes, suitcases and storage totes.

Boats, RVs & gear

Control moisture in cabins, campers, tackle boxes and camping gear between trips.

This product is not for use with food, drugs, or dietary supplements. Keep the beads and buckets out of reach of children and pets, and wash your hands after handling.

RECHARGE & CARE

Bring the beads back to life

Heating drives the absorbed moisture back out of the beads. Blue silica gel recharges in a microwave or an oven, and is ready to go back to work once it has cooled.

Microwave

BLUE SILICA GEL

1. **Pour a layer of beads** into a microwave-safe bowl — no metal, and never microwave the bucket.
2. **Heat on the defrost setting** for 7–10 minutes per 500 g of beads.
3. **Stir carefully** — the beads will be hot — then continue in 1-minute bursts until the colour is fully back to blue.
4. **Cool completely** to room temperature before returning the beads to the bucket or bags.

Oven

SILICA GEL

1. **Preheat** to 200–250 °F (93–121 °C).
2. **Spread the beads** no thicker than about 2 cm on a baking tray — never place the bucket in the oven.
3. **Heat** for 0.5–2 hours.
4. **Cool completely**, then store in an airtight container until the beads go back to work.

WHERE TO BUY

Find Fonday on Amazon

Blue Indicating Silica Gel
ASIN B0FB9CYV45
www.amazon.com/dp/B0FB9CYV45

Available sizes vary by marketplace and pack. Please check the listing in your store before ordering.

Safety when recharging: beads and trays stay hot long after heating — let them cool before handling. Never overheat, never add water to hot beads. This product is not for use with food, drugs, or dietary supplements.
